

Time: 3 hours; Total Marks: 90

General Instructions:

1. All questions are compulsory.
2. The question paper consists of 31 questions divided into four sections – A, B, C and D.
3. Section A contains 4 questions of 1 mark each.
4. Section B contains 6 questions of 2 marks each.
5. Section C contains 10 questions of 3 marks each
6. Section D contains 11 questions of 4 marks each.

Section A

1. If the quadratic equation $px^2 - 2\sqrt{5}px + 15 = 0$ has two equal roots then find the value of p.
2. In the following figure, a tower AB is 20 m high and BC, its shadow on the ground, is $20\sqrt{3}$ m long. Find the Sun's altitude.

3. Two different dice are tossed together. Find the probability that the product of the two numbers on the top of the dice is 6.
4. In the following figure, PQ is a chord of a circle with center O and PT is a tangent. If $\angle QPT = 60^\circ$, find $\angle PRQ$.

Section B

5. In the following figure, two tangents RQ and RP are drawn from an external point R to the circle with center O, If $\angle PRQ = 120^\circ$, then prove that $OR = PR + RQ$.

6. In the following figure, a ΔABC is drawn to circumscribe a circle of radius 3 cm, such that the segments BD and DC are respectively of lengths 6 cm and 9 cm. If the area of ΔABC is 54 cm^2 , then find the lengths of sides AB and AC.

7. Solve the following quadratic equation for x: $4x^2 + 4bx - (a^2 - b^2) = 0$.
8. In an AP, if $S_5 + S_7 = 167$ and $S_{10} = 235$, then find the A.P., where S_n denotes the sum of its first n terms
9. The points A (4, 7), B (P, 3) and C (7, 3) are the vertices of a right triangle, right-angled at B, Find the values of P.
10. Find the relation between x and y if the points A(x, y), B (-5, 7) and C(-4, 5) are collinear.

Section C

11. The 14th term of an A.P. is twice its 8th term. If its 6th term is -8, then find the sum of its first 20 terms.
12. Solve for x: $\sqrt{3}x^2 - 2\sqrt{2}x - 2\sqrt{3} = 0$.
13. The angle of elevation of an aeroplane from point A on the ground is 60° . After flight of 15 seconds, the angle of elevation changes to 30° . If the aeroplane is flying at a constant height of $1500\sqrt{3}\text{m}$, find the speed of the plane in km/hr.
14. If the coordinates of points A and B are (-2, -2) and (2, -4) respectively, find the coordinates of P such that $AP = \frac{3}{7}AB$, where P lies on the line segment AB.
15. The probability of selecting a red ball at random from a jar that contains only red, blue and orange balls is $\frac{1}{4}$. The probability of selecting a blue ball at random from the same jar is $\frac{1}{3}$. If the jar contains 10 orange balls, find the total number of balls in the jar.
16. Find the area of the minor segment of a circle of radius 14 cm, when its central angle is 60° . Also find the area of the corresponding major segment. [Use $\pi = \frac{22}{7}$].

17. Due to sudden floods, some welfare associations jointly requested the government to get 100 tents fixed immediately and offered to contribute 50% of the cost. If the lower part of each tent is of the form of a cylinder of diameter 4.2 m and height 4 m with the conical upper part of same diameter but height 2.8 m, and the canvas to be used costs Rs. 100 per sq. m, find the amount, the associations will have to pay. What values are shown by these associations? [Use $\pi = \frac{22}{7}$].
18. A hemispherical bowl of internal diameter 36 cm contains liquid. This liquid is filled into 72 cylindrical bottles of diameter 6 cm. Find the height of each bottle, if 10% liquid is wasted in this transfer.
19. A cubical block of side 10 cm is surmounted by a hemisphere. What is the largest diameter that the hemisphere can have? Find the cost of painting the total surface area of the solid so formed, at the rate of Rs. 5 per sq. cm. [Use $\pi = \frac{22}{7}$].
20. 504 Cones, each of diameter 3.5 cm and height 3 cm, are melted and recast into a metallic sphere, Find the diameter of the sphere and hence find its surface area. [Use $\pi = \frac{22}{7}$].

Section D

21. The diagonal of a rectangular field is 16 metres more than the shorter side. If the longer side is 14 metres more than the shorter side, then find the lengths of the sides of the field.
22. Find the 60th term of the AP 8, 10, 12,, if it has a total of 60 terms and hence find the sum of its last 10 terms.
23. A train travels at a certain average speed for a distance of 54 km and then travels a distance of 63 km at an average speed of 6 km/h more than the first speed. If it takes 3 hours to complete the total journey, what is its first speed?
24. Prove that the lengths of the tangents drawn from an external point to a circle are equal.
25. Prove that the tangent drawn at the mid-point of an arc of a circle is parallel to the chord joining the end points of the arc.
26. Construct a ΔABC in which $AB = 6$ cm, $\angle A = 30^\circ$ and $\angle B = 60^\circ$, Construct another $\Delta AB'C'$ similar to ΔABC with base $AB' = 8$ cm.
27. At a point A, 20 metres above the level of water in a lake, the angle of elevation of a cloud is 30° . The angle of depression of the reflection of the cloud in the lake, at a A is 60° . Find the distance of the cloud from A.
28. A card is drawn at random from a well-shuffled deck of playing cards. Find the probability that the card drawn is
 - i. a card of spade or an ace.
 - j. a black king.
 - k. neither a jack nor a king
 - l. either a king or a queen.
29. Find the values of k so that the area of the triangle with vertices $(1, -1)$, $(-4, 2k)$ and $(-k, -5)$ is 24 sq. units.
30. In the following figure, PQRS is square lawn with side $PQ = 42$ metres. Two circular flower beds are there on the sides PS and QR with centre at O, the intersections of its diagonals. Find the total area of the two flower beds (shaded parts).

31. From each end of a solid metal cylinder, metal was scooped out in hemispherical form of same diameter. The height of the cylinder is 10 cm and its base is of radius 4.2 cm. The rest of the cylinder is melted and converted into a cylindrical wire of 1.4 cm thickness. Find the length of the wire.

[Use $\pi = \frac{22}{7}$].
